

Multidisciplinary Conferences: A United Front in the Fight on Cancer

Cancer specialists from all treatment and diagnostic modalities - along with the primary care physician - participate in multidisciplinary conferences addressing diagnosis, treatment options and long-term monitoring. Both traditional treatments and open clinical trials are considered. After careful consideration, the consulting physicians reach a consensus recommendation.

There are five different conferences that take place at McLaren Cancer Institute, based on the type of cancer being addressed.

Breast Cancer Conference

Wednesdays, 7:00 am – 8:00 am
Location: McLaren Cancer Institute Conference Room
Coordinator: Kristin Chevrette, RN, OCN
