

McLAREN BUILDING & RENOVATION PROJECT

Artistic Interpretation of the new south wing and grand entrance. Subject to change as design progresses.

McLaren Northern Michigan is building & renovating the Petoskey hospital to accommodate advances in medical technology, and transform the way that patient care is delivered. Every aspect of the facility is designed to promote safety, comfort, and healing.

building the **FUTURE** of **HEALTH CARE**

The new McLaren Northern Michigan hospital will promote healing in a calming, patient-centered environment with the flexibility to adapt to new technologies and life-saving innovations not yet discovered.

Site preparation for the new hospital wing will begin the summer of 2017. The expansion and renovation of the hospital is expected to be completed in the summer of 2022.

McLaren Northern Michigan will remain fully operational during expansion and renovation.

McLAREN BUILDING & RENOVATION PROJECT

Artistic Interpretation of the new grand lobby, private patient room, and operating room. Subject to change as design progresses.

PROJECT TIMELINE

PHASE 1

 **McLaren**
NORTHERN MICHIGAN

PROJECT Highlights

- Over 170,000 sq ft of additional space
- Adding 92 private patient rooms
- Private rooms to increase privacy, reduce stress, and accommodate more family and visitors
- Adding 12 observation beds
- ICU beds will increase from 18 to 24
- Over 45 current patient rooms converted to private
- New state-of-the-art operating rooms
- Natural lighting and universal floor plans
- Amenities for patients, families, and visitors
- All of this will be accessed through one of two main entrances...one being a redesign of our current lobby, and the other a grand new entrance
- New parking lot to accommodate over 300 vehicles

Building the future of health care
