Ambulatory: McLaren Sleep Study Workflow Review

April 18, 2024

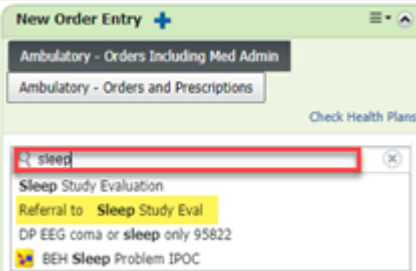

## McLaren Sleep Study Evaluation Order Overview

**Positions Impacted:** All Ambulatory Providers

Providers who need to order a Sleep Study Eval order should follow the below process to ensure that the order is sent to the McLaren Sleep locations for scheduling.

**Order to Place:** Sleep Study Evaluation

**Enhancement Effective 4/18/24 by EOB:** A new order synonym will be added so Providers can search by "Sleep", or "Referral to" to find the order.

Existing Order	New Order Synonym	
Sleep Study Evaluation	Referral to Sleep Study Eval	

**Workflow Result:** The "Sleep Study Evaluation" order will route to the scheduling queue based on the location selected when ordering. The McLaren staff will contact the patient to schedule.

- Note:** Please do not use Referral Management when sending the patient to a McLaren location - they do not use Referral Management, so there is not a way for them to receive the order.

**Enhancement Effective 4/18/24 by EOB:** The Sleep Study Evaluation order will also be added to the Quick Orders Page in the Internal Ancillary Referrals section of the Referrals component for easy access.

**Prior to this Enhancement:** Providers could only search and select the Sleep Study Evaluation order when a sleep study was needed to be performed at a McLaren location.
