

Michigan GENERAL TREATMENT GENERAL PRE-HOSPITAL CARE

General Pre-Hospital Care

Unless otherwise stated, pediatric protocols will apply to patients less than or equal to 14 years of age or up to 36kg.

- 1. Assess scene safety and use appropriate personal protective equipment.
- 2. Complete primary survey.
- 3. When indicated, implement airway intervention as per the **Emergency Airway Procedure.**
- 4. When indicated, administer oxygen and assist ventilations as per the **Oxygen** Administration Procedure.
- 5. Assess and treat other life threatening conditions per appropriate protocol.
- 6. Obtain vital signs including pulse oximetry if available or required, approximately every 15 minutes, or more frequently as necessary to monitor the patient's condition (minimum 2 sets suggested).
- 7. Perform a secondary survey consistent with patient condition.
- 8. Follow specific protocol for patient condition.
- 9. Document patient care according to the Patient Care Record Protocol.
- (S) 10. Establish vascular access per Vascular Access & IV Fluid Therapy Procedure when fluid or medication administration may be necessary.
- 11. Apply cardiac monitor and treat rhythm according to appropriate protocol. If applicable, obtain 12-lead ECG. Provide a copy of the rhythm strip or 12-lead ECG to the receiving facility, be sure to place patient identifiers on strip.
 - 12. Consider use of capnography as appropriate and if available, per **Waveform Capnography Procedure**.
- **NOTE**: When possible, provide a list of the patient's medications or bring the medications to the hospital.
