

Project ECHO

Transforming Care for
the Treatment of
Opioid Use Disorder

Presenters

Jill Covyvou, PharmD
Ferris State University
College of Pharmacy

Kathleen Schachman, PMHNP, PhD
Saginaw Valley State University
College of Health & Human Services,
Nursing Department

Disclosures

Dr. Covyvou and Dr. Schachman have no conflicts of interest and no personal financial relationships with commercial interests relevant to this presentation

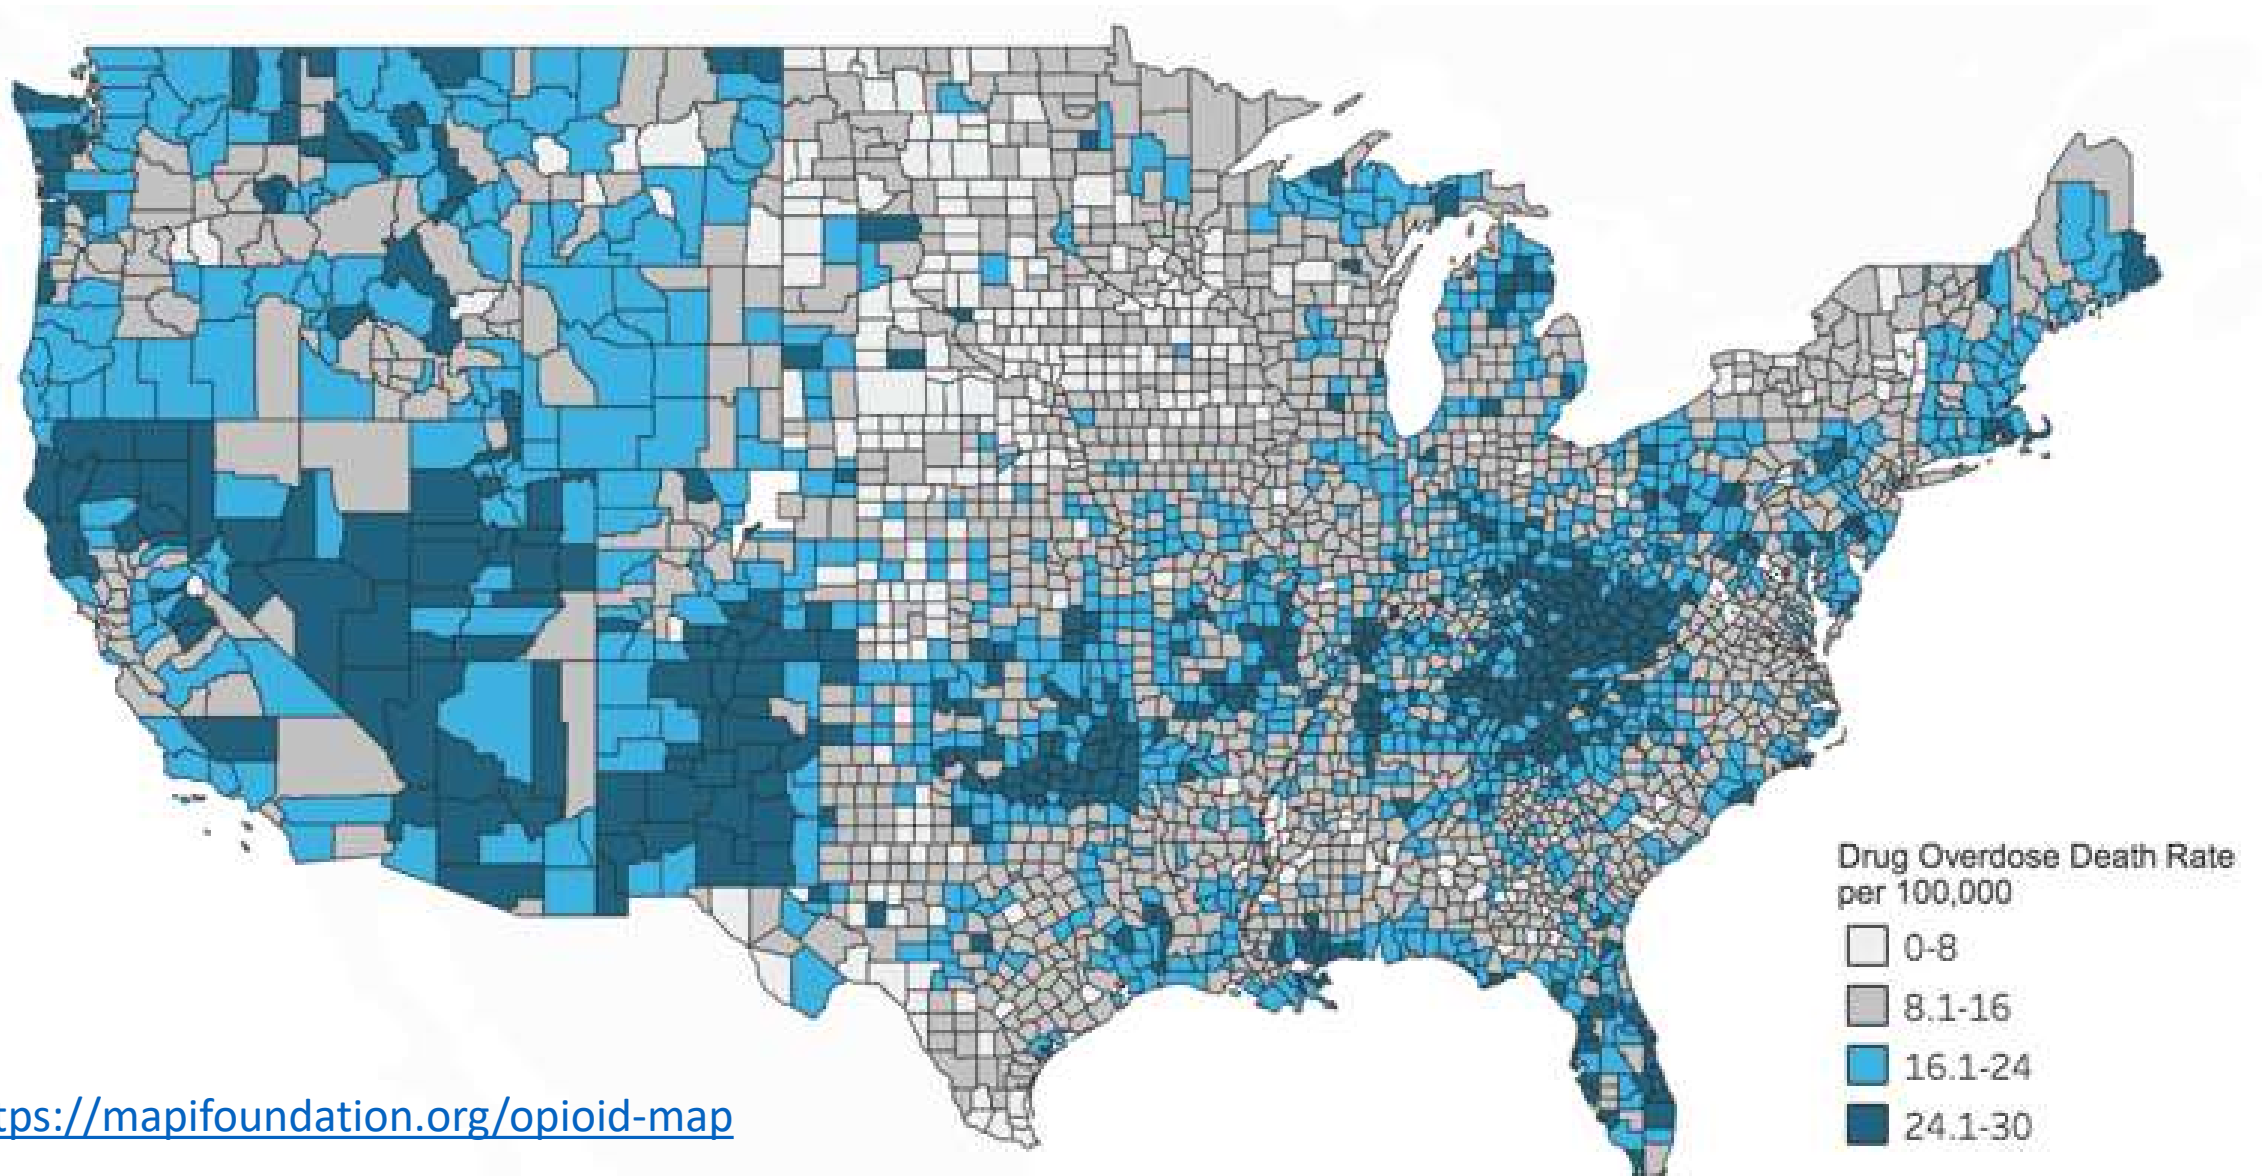

This project is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under the following grant number UD7HP29871, titled Integrated Collaborative Care Delivery at an Interprofessional University Clinic, for \$1,967,380 and grant number T94HP30878, titled Enhancing Rural Competence Through the SVSU FNP Rural Residency Program, for \$1,554,244. This information or content and conclusions are those of the authors and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.

Objectives

- Identify steps to access the SVSU Project ECHO sessions
- Identify practice benefits to participating in substance abuse disorder training programs
- Give examples of how interdisciplinary members of the health care team could benefit patient care when treating opioid use disorder

Opioid Overdose Death Rate (2017)

In Michigan.....

ONLY **2** out of **10** people with substance use disorder (SUD) are in treatment

Barriers to SUD Treatment

- Did not perceive a need for treatment/want to handle on their own (93%)
- Not ready to stop using (38%)
- Could not afford/No insurance coverage (27%)
- Did not know where to go (19%)
- Did not find program that offered type of treatment they wanted (14%)
- Negative opinion of neighbors/community (13%)
- Negative effect on job (12%)

Treating Substance Use Disorders in Primary Care

- Opportunities to screen and intervene
- Improves access to SUD treatment within a familiar environment
- Less fragmented, easier to navigate
- Normalize their treatment and bring them into the mainstream of medicine
- Reduces stigma (both internal and external)
- Creates opportunities to concurrently manage other chronic diseases
- Rewarding: rare opportunity to see dramatic clinical improvement

Treating Substance Use Disorder with Buprenorphine

- Buprenorphine is EFFECTIVE in treating opioid addiction
 -  cravings
 -  blocks effects of opioids
 -  overdose potential

Office-based opioid treatment (OBOT) with buprenorphine has the potential to expand access and utilization of effective treatment for opioid use disorder

Buprenorphine Prescribing

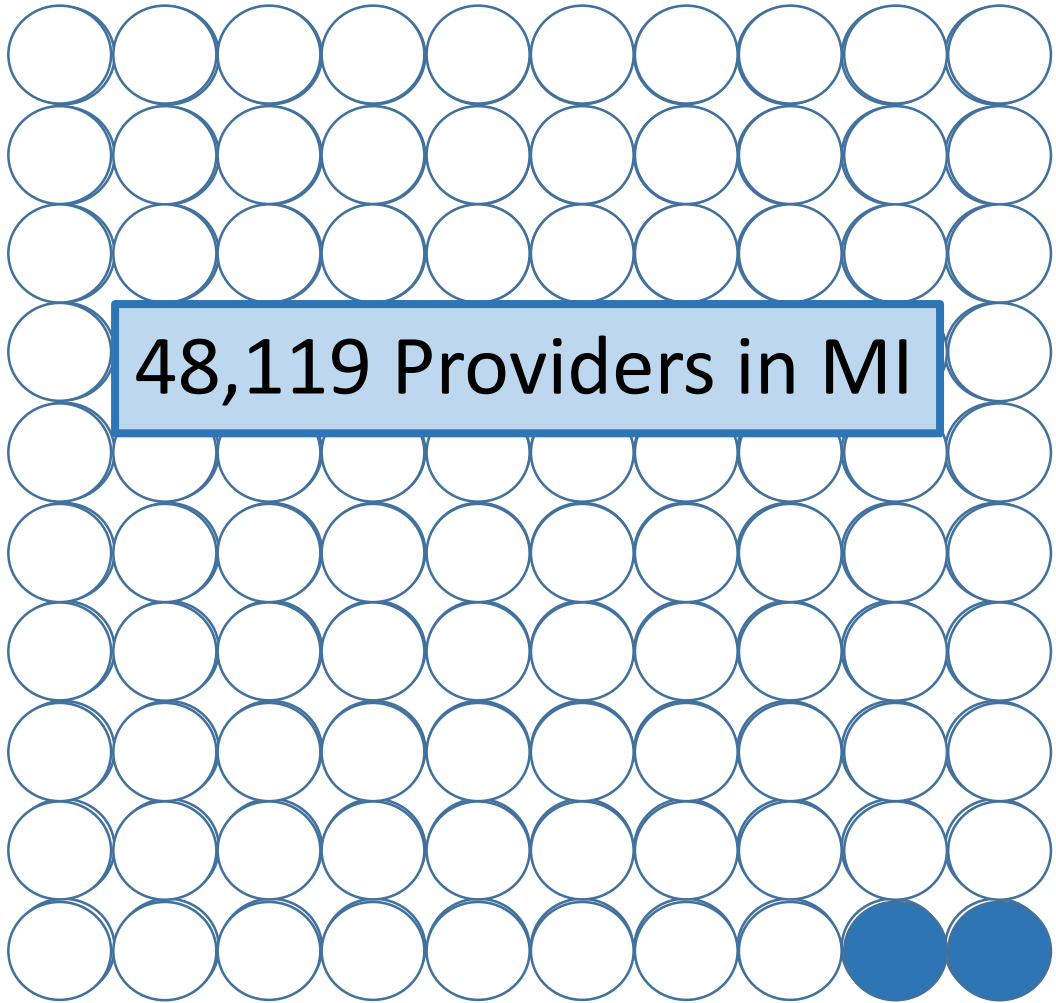

- Office-based Prescribing: physicians, nurse practitioners, and physician assistants
- DEA waiver
 - Training: 8 hours (physicians) or 24 hours (PA and NP)
- Patient limits:
 - Initially 30 for 1 year, then eligible to increase to 100.
 - 275 for Addiction Medicine or Addiction Psychiatry, and those in “qualified practice setting”

DATA 2000 Waiver: Suboxone Certification

*A Continuing Medical Education Program
Substance Use Disorder Initiative*

Prescribing Buprenorphine in Michigan

48,119 Providers in MI

1,091 have waiver

Just over 48,000 providers in MI

38,819 Physicians

4,750 Physician Assistants

4,550 Nurse Practitioners

MI providers with DEA waiver to
prescribe buprenorphine = 1,091 (2.3%)

[SAMSHA Buprenorphine Practitioner Locator](#), July 2019

U.S. average = 4.2%

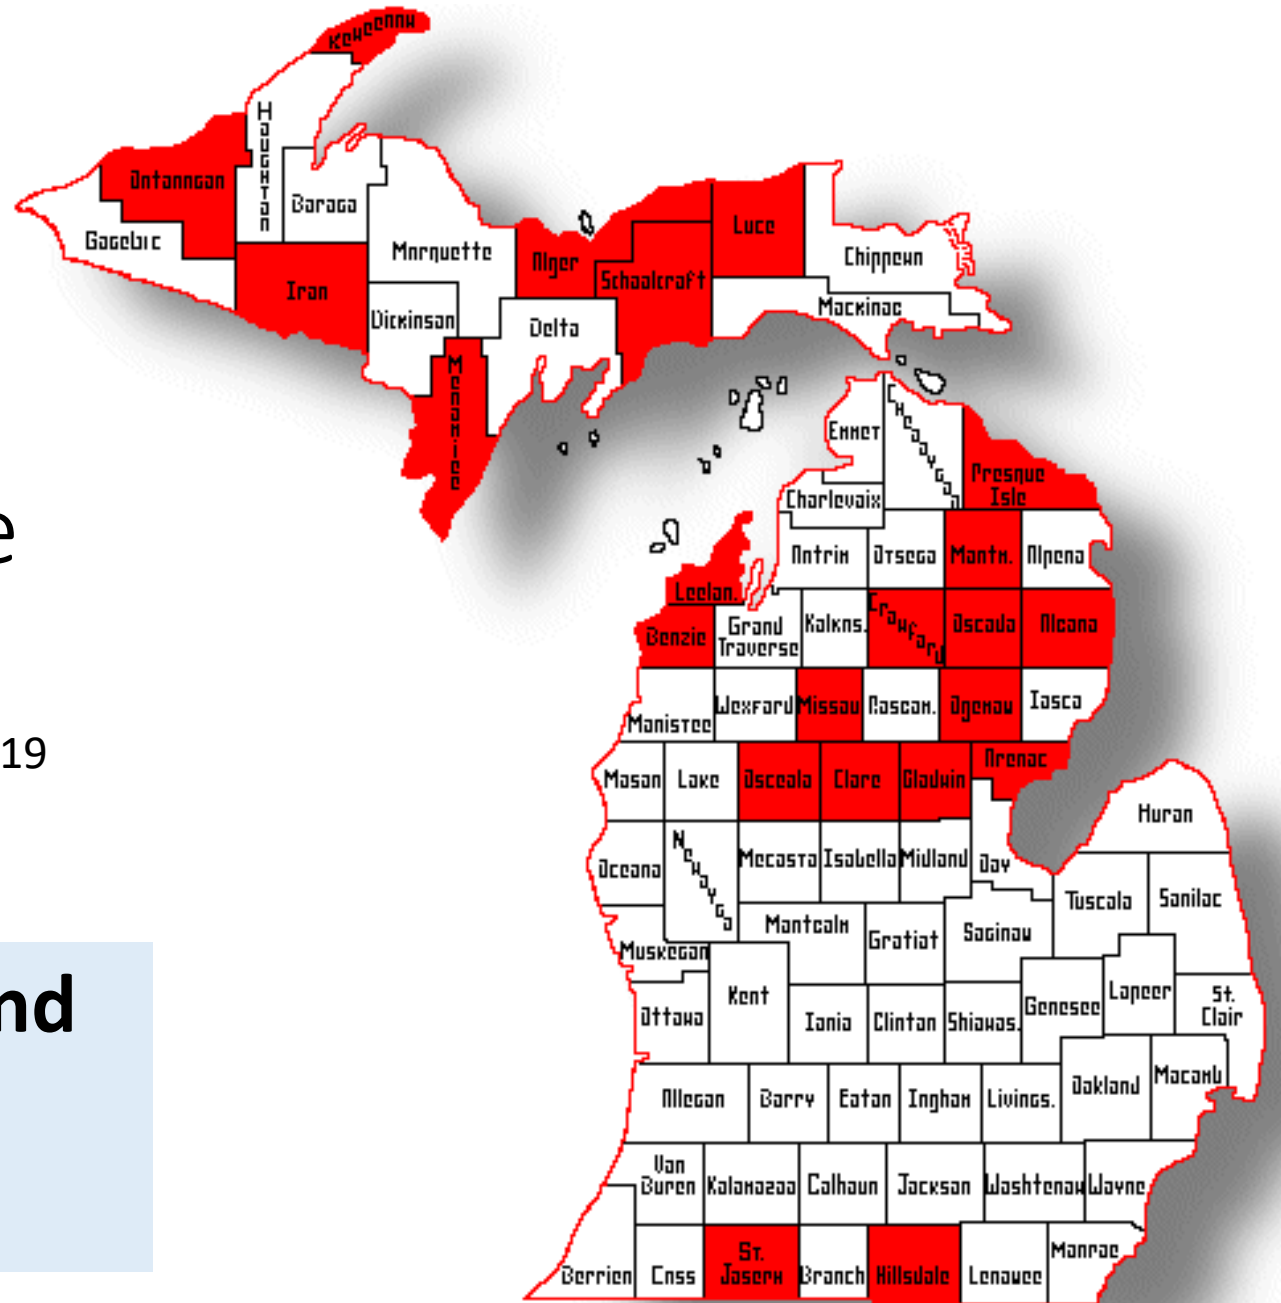

MI would need **1,000 more** buprenorphine
prescribers to achieve national average

Michigan counties without a Buprenorphine prescriber

[SAMSHA Buprenorphine Practitioner Locator](#), July 2019

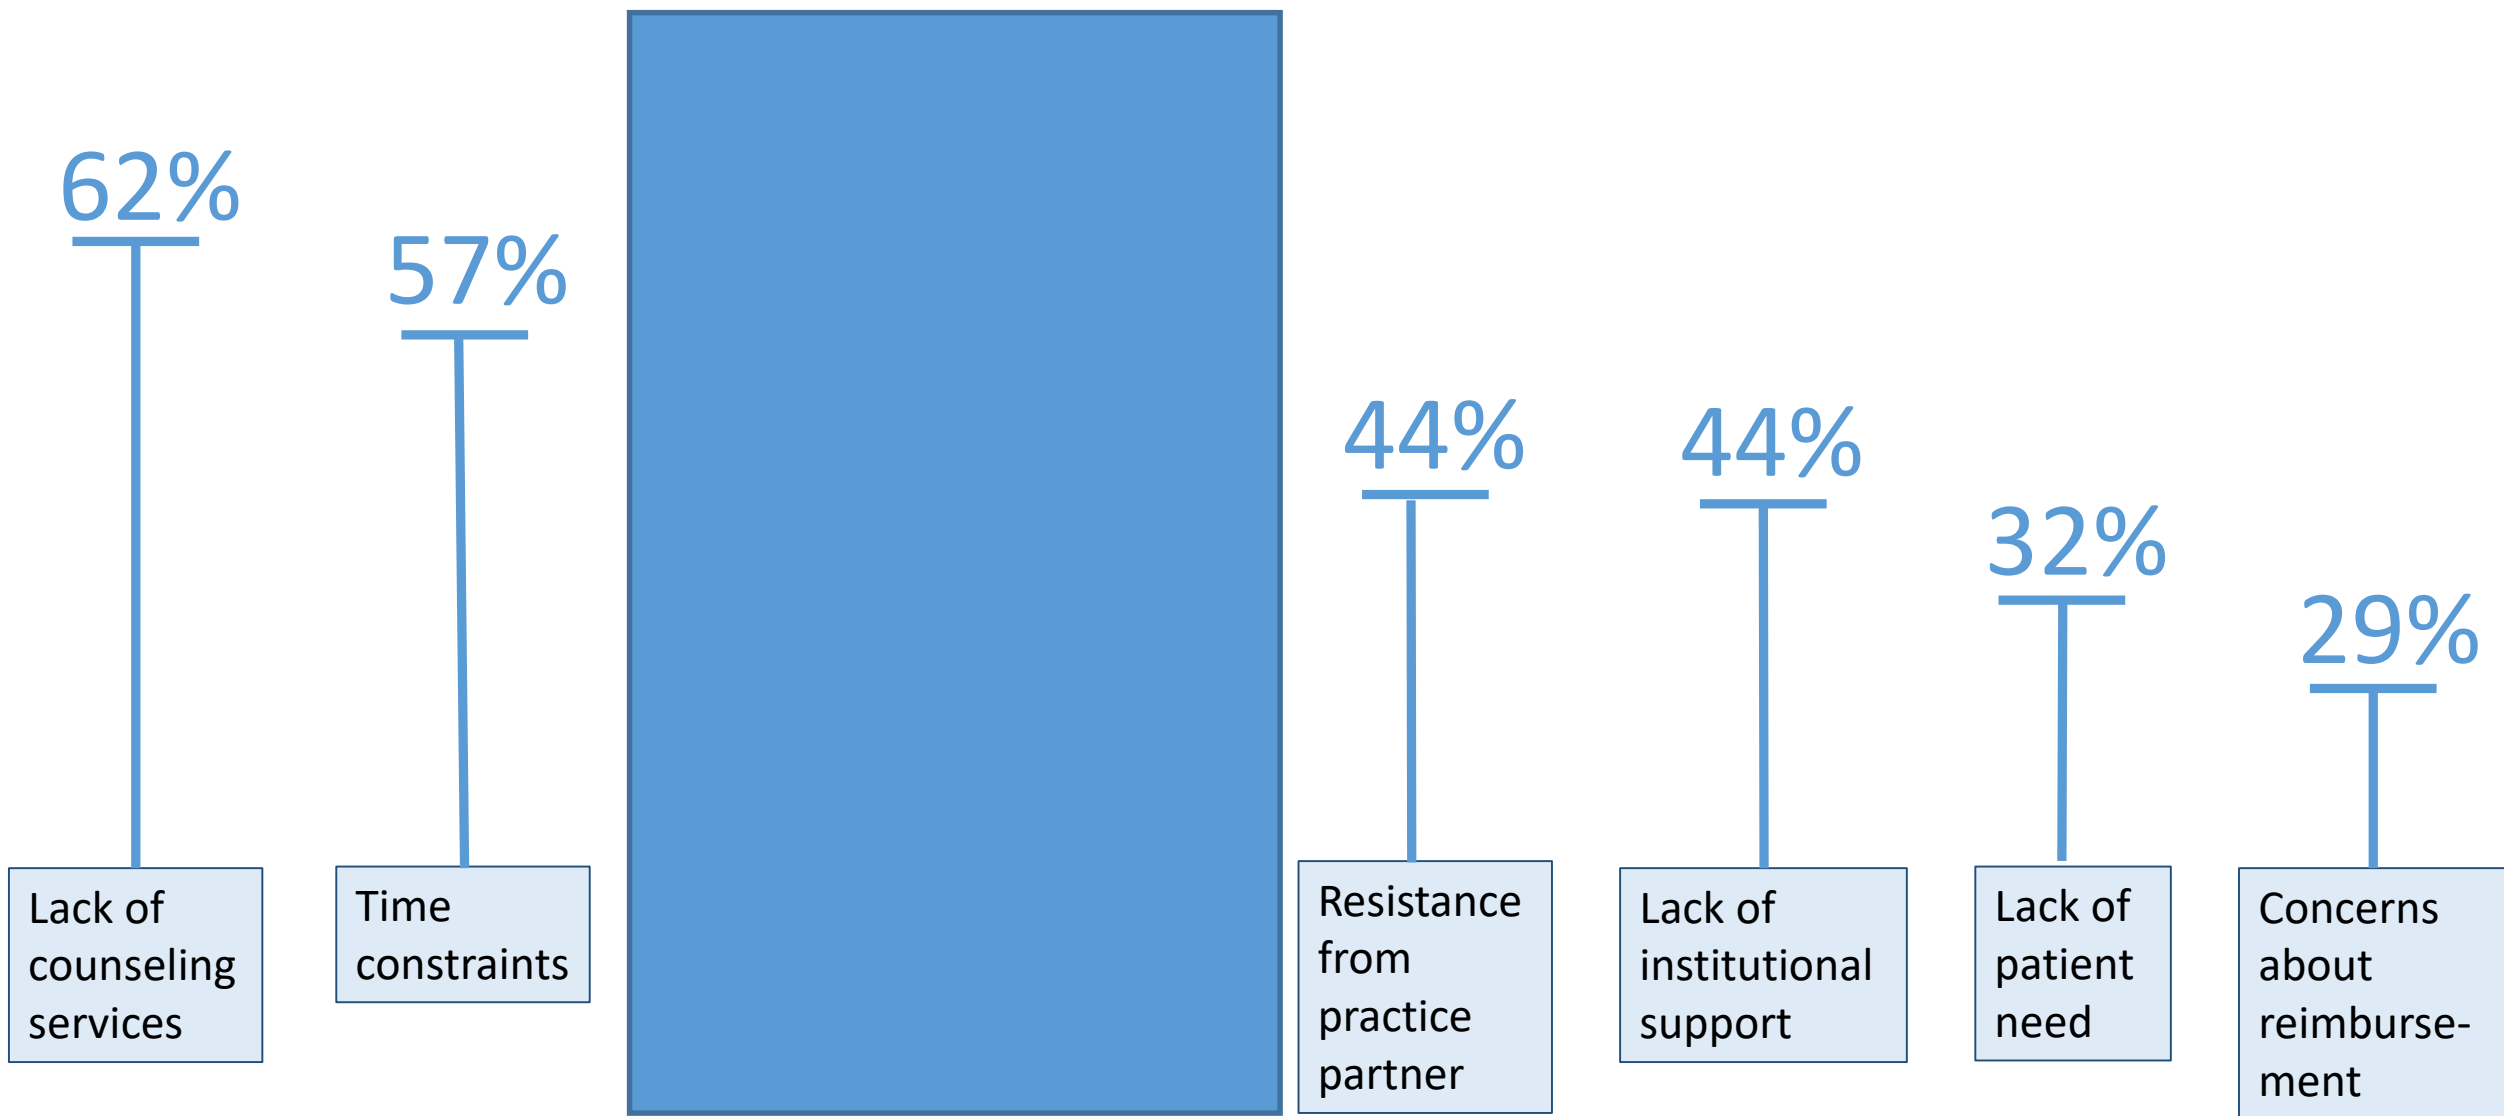

It is EASIER to obtain heroin and fentanyl than it is to get a buprenorphine prescription.

Roy & Stein, 2019

Barriers to Primary Care Physicians Prescribing Buprenorphine

Hutchinson et al., 2016

Project ECHO (Extension for Community Healthcare Outcomes)---Moving Knowledge, Not People

EXPERT HUB TEAM

COMMUNITY-BASED PRIMARY CARE TEAMS

PATIENTS REACHED WITH SPECIALTY KNOWLEDGE

Project ECHO Outcomes

Arora et al., 2011

- Similar clinical outcomes
- High patient satisfaction—cared for by primary care provider in own community
- Cost savings r/t travel

- Increased confidence and competence in managing complex disease conditions
- Decreased professional isolation

PATIENT

Ideal for expanding specialty treatment capacity in remote and underserved areas.

PROVIDER

Doing More for More Patients

PATIENT

- Right Care
- Right Place
- Right Time

PROVIDER

- Acquire New Knowledge
- Treat More Patients
- Build Community of Practice

COMMUNITY

- Reduce Disparities
- Retain Providers
- Keep Patients Local

SYSTEM

- Increase Access
- Improve Quality
- Reduce Cost

Project ECHO and SUD Treatment

What the research shows.....

- Knowledge
- Self-efficacy
- Attitudes
- Feelings of mutual support and camaraderie

- Number of buprenorphine providers

- Isolation and burnout

Saginaw Valley State University Project ECHO

- Launched October 2018
- Focus is on **Substance Use Disorder**
- Continuing education credits
 - CMEs from MidMichigan Health
 - Social Work CEs from Bay-Arenac Behavioral Health
 - MCBAP CEs from MidState Health Network
- Seeking ASAM approval for curriculum, providers will receive training toward buprenorphine waiver-- **pending**
- Video-conference meetings will be held twice a month (1st and 3rd Wednesday, 12 noon to 1:30)

Our Expert Hub Team

*William Morrone,
DO, MPH, MS,
FAOAAM, ASAM,
FACOFP,
DABAM, DAAPM*

Addictionologist

*Jennifer Kreiner,
MSN, NP-C, CEN*

Mental Health
Expert

*Matthew
Mitchell, LMSW,
CAADC*

Substance Use
Disorder
Counselor

*Jill Coveyou,
Pharm.D.*

Pharmacist

Peer Recovery
Support Expert

Recovery
Pathways, LLC

The Spokes: Anyone Passionate About SUD!

- Physicians (Family Medicine, Psychiatry, Emergency, Surgery)
- Nurse Practitioners (Family, Psychiatric Mental Health)
- Social Workers (Counseling/Therapy, Case Management)
- Healthcare Administration
- Occupational Therapists
- Physical Therapists
- Peer Recovery Coaches
- Pharmacists
- Dieticians
- Students!

Typical Agenda of ECHO Session

12:00 – 12:10

Hub and spoke introductions, welcome

12:10 – 12:35

Didactic presentation on topic related to SUD

- Examples: types of MAT and treatment options, evidence-based adjunct therapies, motivational interviewing, SUD in special populations

12:35 – 12:45

Didactic Q & A

12:45 – 1:20

Case presentation

- Community provider(s) present a de-identified patient case (no PHI!)
- Spokes and hub ask clarifying questions
- Spokes and hub provide treatment recommendations

1:20 – 1:30

Closing Q & A and wrap-up

Cases are highly interactive, clinically-focused, and respectful

Structure of an ECHO Session, cont.

Aims of the SVSU Project ECHO

- Increase confidence and competence of healthcare teams in identifying and treating SUD– especially rural MI
- Increase # of providers in rural MI who have buprenorphine waiver (and who use it!)
- Create a culture of “all teach, all learn!”

OUTCOMES

Location of Participants

226
Participants

86
Clinics

■ Other

■ Social Worker

■ Administrator

■ Peer Recovery Coach

■ Physician

■ Nurse Practitioner

Did you learn something that will be useful in caring for your patients?

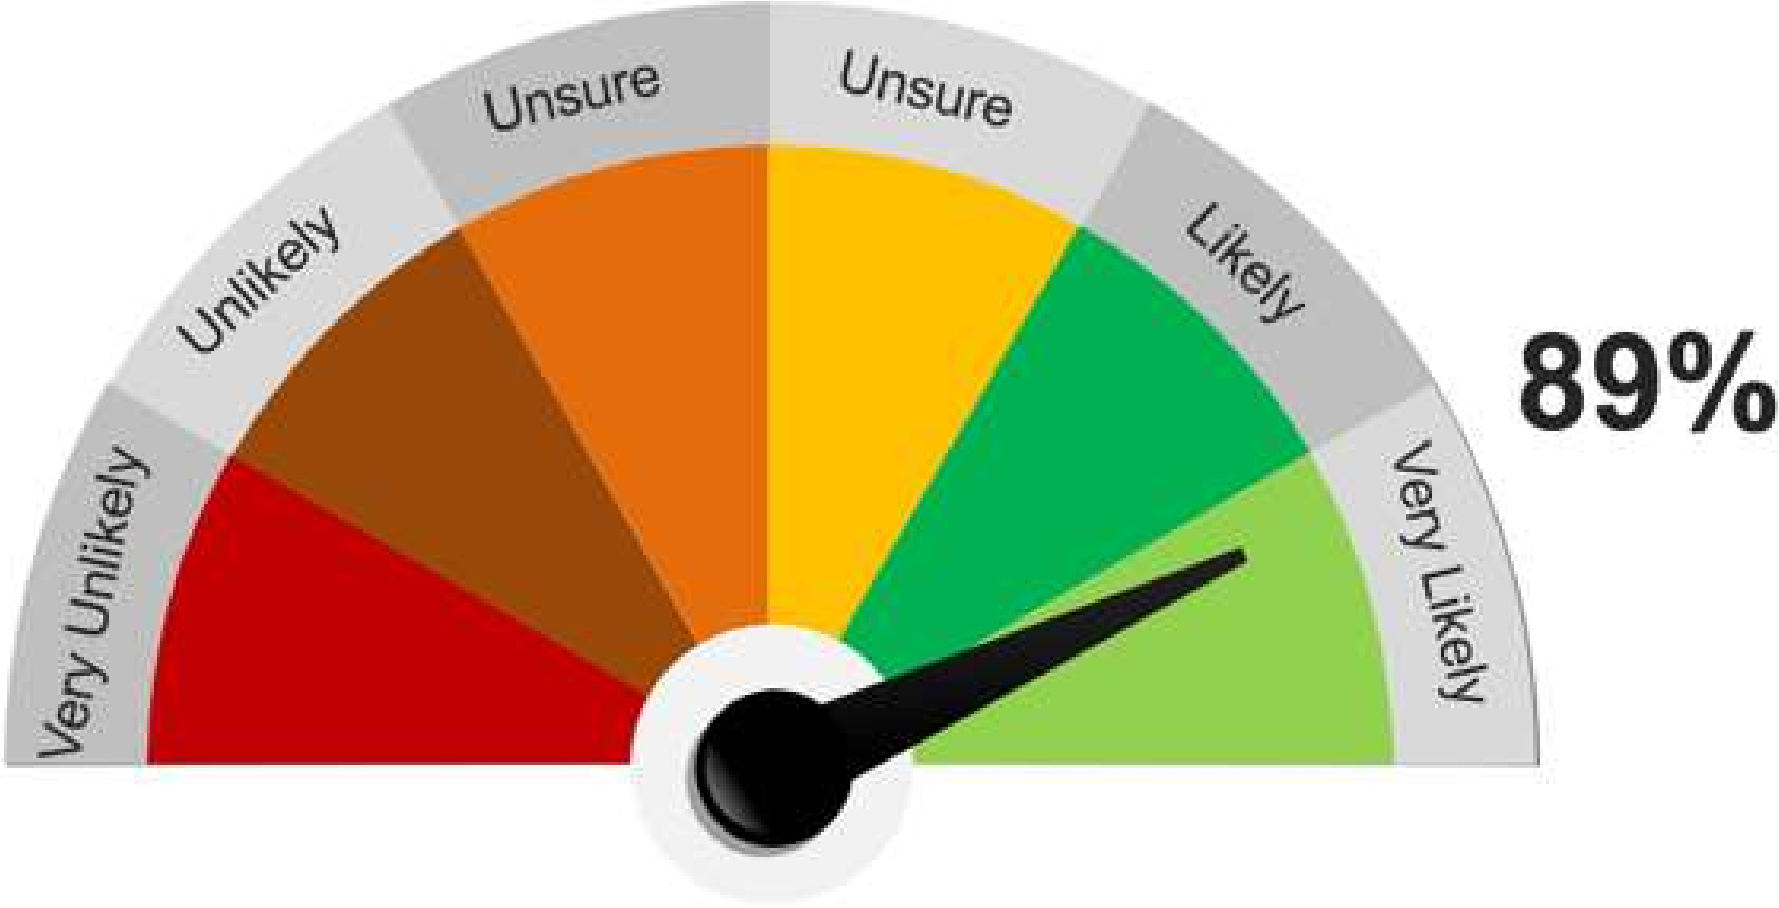

98%

2%

“How likely are you to make changes to your practice as a result of Project ECHO?”

Changes I will make in my practice....

IDEA

More informed communication with peers

ANALYSIS

Screen for ACE/ask more questions about history/childhood

SOLUTION

Able to expand my treatment options

Better able to manage pain in those with SUD

WORK

Interprofessional intervention planning including dietitian, medications management alternatives

SUCCESS

More confident in my ability to provide MAT for my patients.

Continue waiver training/less fear of taking this on

What are the barriers in making changes to your practice?

- Any changes would come from the medical director
- Not have enough training in SUD
- No support from administration

- Concern about regulations and interference/harassment from regulatory agencies
- Collaborating physician does not have/want waiver

Opportunities of Project ECHO

- Enables healthcare teams to deliver the best evidenced-based care to patients in their own community → improves access
- Healthcare teams feel supported, ↓ professional isolation
- Allows members of the healthcare team to better understand the contributions of other team members

Costs to launch and maintain Project ECHO

Start-Up Costs

- 3-day team training (University of New Mexico): \$5,000
- Videoconferencing equipment: \$10,000

Start-Up Costs: \$15,000

Ongoing Costs: \$98,500

Ongoing (Annual) Costs

- Project Manager, Community Outreach, IT & Administrative support (0.2 FTE): \$45,000
- Hub Team: \$40,000
- Guest speakers: \$2,500
- Promotional materials: \$3,000
- Continuing education: \$3,000
- Room rental with videoconferencing ability & support: \$5,000

The screenshot shows the Project ECHO website for Saginaw Valley State University. The top navigation bar includes the SVSU logo and the text 'SAGINAW VALLEY STATE UNIVERSITY'. Below this, a dark blue header contains 'SVSU / Project ECHO'. The main content area features a large image of a sunset over a snowy landscape with the text 'Project ECHO.' overlaid. Below the image is the heading 'Project ECHO: A Revolution in Medical and Care Delivery' and a paragraph of introductory text. On the left side, there is a vertical menu with the following items: 'Project ECHO', 'Register' (circled in blue with an arrow pointing to it), 'Upcoming Sessions', 'Meet Our Team', 'Resources', 'What is ECHO', 'Why Join', 'Present a Case', 'FAQs', and 'Disclaimer'. At the bottom left, there is a 'Contact Us' section with the email 'echo@svsu.edu' and the phone number '(989) 964-7161'. The bottom right corner of the page is labeled 'Office'.

- All teach, all learn!
- Sharing to inspire, develop, and help others
- Building systems to make knowledge readily available
- Amplifying access, building capacity

Thanks for listening!
The ECHO Team
