

Dragon Medical One - PowerMic Mobile Added to Login Screen

Dragon Medical One will be updated on 10/25/18 with a new option in the Microphones dropdown, adding Nuance PowerMic Mobile (PMM) as an option. A pre-selected group of physicians will be participating in a pilot program to evaluate the product, after which it will be determined if and when to deploy to a larger group of users.

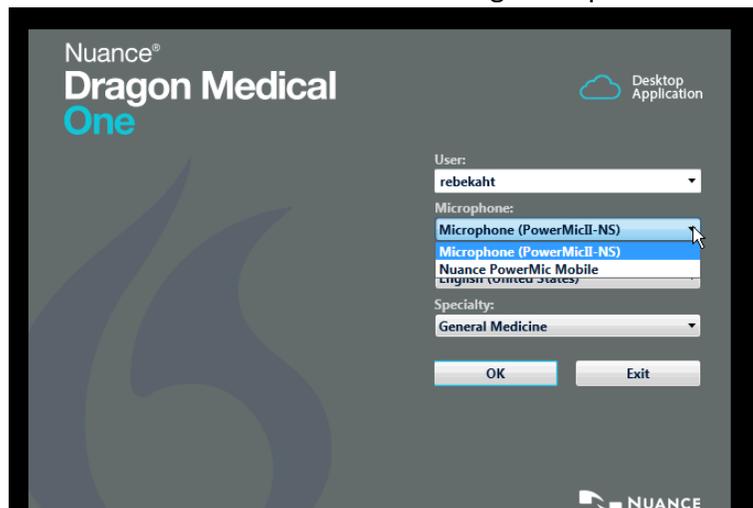

This is how the dropdown looks currently:

Please ensure the microphone you want to use is highlighted! If you accidentally choose the wrong mic, use this option to log out and select the correct microphone.

This is how it will look when the change is implemented:

The application should remember your default selection after you choose the microphone the first time.

You should not notice any other changes in functionality due to this update.
