## Cerner PowerChart and FirstNet DMO Citrix Change

The Citrix behavior of the DMO applications will be changed on 6/20/2019 to resolve miscellaneous stability issues. This will only affect users who open the DMO application a second time.

Currently a second application launch will open a new instance of DMO. After this change, upon a second launch, the original DMO application will now move from PC#1 to PC#2.

The FirstNet and PowerChart icons will not be affected by this change and will continue to allow multiple sessions.
