7/24 Downtime Computers

The 7/24 Computers installed in various departments are **ONLY** to be used in the event of a system downtime. These computers can be identified by the red keyboard attached to the computer.

Please also avoid stacking any loose papers on these computers and leave them plugged in.

It is important that these PC's are not used day to day by staff so that they receive their proper database updates from Cerner so that in the event of a downtime they have accurate data.
