

CERNER FLASH

12/12/2018

Harmony Downtime for MGL HPF archived images only

On 12-14-2018 at 12 pm, Harmony access within the CERNER application will be limited during the downtime. HPF document images loaded into Harmony will not be available.

The downtime will allow Harmony to bring in the changes that will allow for better speed in refreshing the legacy HPF data.

These documents are normally accessed through the dark gray table of contents menu on the left toward the bottom through the link that looks like this:

During the downtime MGL Paragon WSP should be used if any documents need to be reviewed dated before June 2nd 2018.

The Following Link can be used to access WSP
