Procedural Sedation Documentation Changes

Issue: Required procedural sedation documentation per policy was not available in procedural sedation iView bands
Resolution: On 11/27, procedural documentation bands will be updated to include additional documentation bands

1. Modified Aldrete Band—organizes pre and post aldrete scores together to make it easier to find and compare pre and post sedation scores
2. Pain Tools Band—organizes both verbal and the new non-verbal pain scores together in the same band. Also added non-verbal pain assessment and scoring.

3. Added Depth of Sedation and Level of Consciousness to Procedural Sedation Monitoring Bands

4. Added other procedural documentation previously missing from bands such as "Procedure Performed"
