Modifying Medication History

From the **Perioperative Preprocedure Checklist** powerform.

1. Click on **Medication History** section from the left table of contents
2. Click on **Document Medication by Hx** button
3. Select the Documented home medication from the list then right-click
4. Select **"Modify"**

The screenshot displays the Cerner EHR interface for a patient named ZZTEST, PATIENT FOUR. The left sidebar contains a table of contents with 'Medication History' highlighted (1). The main window shows the 'Medication History' section with a 'Document Medication by Hx' button (2). A list of medications is shown, with 'FLUoxetine (PROzac 20 mg oral capsule)' selected and right-clicked (3). A context menu is open, showing 'Modify' highlighted (4). Below the list, the details for the selected medication are shown, including a 'Document History' button (5) in the bottom right corner.

5. Change any of the medication details as appropriate then click the **Document History** button in bottom right corner
