RADIOLOGY RESULTS TO MESSAGE CENTER

Please note that the rule that has been created to send a message to the provider message center stating: New Radiology Results has been turned off. The issue preventing the Radiology Results from filing directly to the Message Center has been corrected so there is no need for the duplicate notification created by this rule.

Providers should now only see the Results populate under the Results tab in the message center:

Patient Name	Abnormal	Outstanding Orders	Status	Result Type
[REDACTED]			Pending	Radiology
[REDACTED]			Pending	Radiology
[REDACTED]			Pending	Document - mdoc
[REDACTED]	Critical: 0 High: 0 Low: 0 Abnormal: 0	2	Pending	
[REDACTED]	Critical: 0 High: 5 Low: 2 Abnormal: 1		Pending	
[REDACTED]			Pending	Radiology

If any providers see an instance where they do not receive a result as expected, please contact the Atos Service Desk.
