Notes

Residents are allotted twenty paid weekdays off per academic year. Residents may not have scheduled vacations during ICU or Night Float rotations and only once during IMTS and twice during clinic weeks throughout their 3 years. Vacation cannot be taken in such a way as to eliminate entire designated rotations from their schedule. E.g. taking weeks 21-22 off in PGY-2 year is not permitted. Vacation must be taken in increments of 5 days.

All residents are scheduled to complete a 4 + 2 + 2 schedule, during your two week clinic you will have the opportunity to rotate through sub-specialty clinics as part of an elective on two half days/week.

Available elective rotations include Cardiology, Nephrology, Pulmonology, Infectious Disease, Emergency Medicine, Neurology, Hematology/Oncology, Rheumatology, Gastroenterology, Endocrinology, Geriatrics, Pain/Addiction, Palliative, Hospice, Anesthesia, Dermatology, Interventional Radiology, Radiology, Ob/Gyn. Residents may request Program Director approval to deviate from the listed options given. These rotations must remain within the McLaren HealthCare system.

One Elective rotation may be taken outside McLaren HealthCare system, but must be approved by the Program Administration.

Individualized Learning happens during all electives and during four half days during clinic rotation. Total Individualized Learning Experience time is 6 months.

Training Sites

1. McLaren Port Huron
2. PACE
