

The McLaren Greater Lansing Family Practice residency program has opened a manipulative medicine consulting service at the McLaren Multi-Specialty Clinic. We are offering a full range of OMT services to the community including:

- Pediatric, adult, and geriatric care of musculoskeletal dysfunction
- OMT during pregnancy, in preparation for childbirth, and postpartum
- Post-surgical OMT to increase blood flow, decrease pain, and promote healing

The family practice residents perform OMT on a daily basis and are excited to offer this healing service under the supervision of specialized OMT physicians from the community.

Please use the attached referral form to help guide our treatment of your patient. As a referring physician you can expect a letter updating you on treatments your patient has received and our plan of care. Your patient will only be evaluated and treated for services indicated on the referral form. All other healthcare concerns will be directed back to you as the patient's primary care physician.

We offer OMT services weekly on Wednesday mornings from 8am to noon. Currently appointments for new patients are available within 1-2 weeks. Urgent appointments are available upon request.

McLaren employees may directly contact the Multispecialty Clinic (517-975-3750) to arrange an appointment without a referral if allowed by your insurance.

If you have further questions please contact Brenda McCaige at 975-3760
