

Meet McLaren

KARMANOS CANCER INSTITUTE AT McLAREN GREATER LANSING GENITOURINARY MULTIDISCIPLINARY CLINIC

The Genitourinary Multidisciplinary Clinic (GU MDC) provides comprehensive care for the patient and caregivers during a stressful time in their lives.

The GU MDC streamlines the complex system of care for our patients, including coordinated and supported appointments, reducing anxiety with the availability of seeing multiple members of the treatment team on the same day, in the same location.

The multidisciplinary clinic is located at:

3520 Forest Road, Lansing, MI 48910

Phone: (517) 975-7815

Fax: (517) 975-7810

To refer a patient, please submit a referral through Cerner or fax a referral form to (517) 975-7810.

The Genitourinary Multidisciplinary Clinic provides patients with:

- Urology consultation
- Medical oncology consultation
- Radiation oncology consultation
- Tumor Board case review
- Support services:
 - Nurse navigator
 - Tumor board team
 - Oncology social workers
 - Clinical trial access
 - Genetic testing
 - Support groups
 - Cancer rehabilitation

THE NEW KARMANOS CANCER INSTITUTE IN LANSING

The brand new Karmanos Cancer Institute is conveniently located in Lansing at the McLaren Greater Lansing health care campus, adjacent to Michigan State University.

This state-of-the-art center offers 38 infusion bays with natural lighting and comfort for patients, 23 exam rooms, the latest in radiation therapy technology, a women's center and boutique, healing arts space, calming artwork of area landscapes, and natural light and greenery throughout the building to give patients a peaceful feeling during treatment.

The Genitourinary Multidisciplinary Clinic treats all types of genitourinary cancers including:

- Urethral
- Testicular
- Prostate
- Adrenal
- Bladder
- Kidney
- Penile

GENITOURINARY MULTIDISCIPLINARY CLINIC

NURSE NAVIGATOR

The nurse navigator provides assistance and support to the patient and family by removing barriers to care. Patient education, physician-patient communication, and taking the time to listen to the patient and family's concerns are just some of what a nurse navigator offers.

Patrick Fox, BSN, RN

Phone: (517) 975-7815 Fax: (517) 975-7810

TUMOR BOARD TEAM

The tumor board team is made up of a group of specialists that includes medical and radiation oncologists, urologists, radiologists, pathologists, and oncology nurse navigators. This team meets during each GU MDC to discuss and develop a personal plan of care for each patient. This plan of care is then discussed with the patient and the family on the same day.

ONCOLOGY SOCIAL WORKERS

Oncology social workers are available for patients and their families throughout all phases of the cancer journey to help adapt to the stresses related to their diagnosis, leaving them free to concentrate on recovery.

Michele Loree, MSW-OSW-C

Phone: (517) 975-7800 Fax: (517) 975-7810

Heather Spotts, MSW-OSW-C

Phone: (517) 975-9500

CLINICAL TRIALS

Karmanos Cancer Institute has more than 800 scientific investigation programs and clinical trials available, including those for prostate, bladder, and urinal cancers. Patients are given the option of participating in a clinical trial. A screening process is performed by a clinical trial specialist and physician to determine if the patient is able to participate in a specific trial.

GENETIC TESTING

Cancer genetic counseling services help the patient and their family learn about the impact their personal and family history has on their chance of developing cancer, and the risk other family members may have in getting cancer. Genetic testing also helps the patient understand prevention, early detection, and treatment options.

REHABILITATION SERVICES

Highly trained physical and occupational therapists are available to design individualized treatment programs based on an initial evaluation and the patient's functional goals. Genitourinary specialized therapies include pelvic pain therapy and incontinence therapy.

FINANCIAL NAVIGATOR

Financial burden can add stress and distraction from treatment for the patient and family. McLaren Greater Lansing offers assistance with the help of a financial navigator. If a patient has questions or concerns about their insurance or ability to pay your medical bill, our financial navigator can meet with them and help to answer their questions and concerns.

PROSTATE CLINIC

The prostate clinic is designed to provide high quality, multidisciplinary care and reduce a patient's time from diagnosis to treatment. This clinic is dedicated to the evaluation and management of patients with a recent diagnosis of prostate cancer, abnormal screening PSA, or digital rectal examinations. The clinic is comprised of a prostate nurse navigator, radiation oncologist, medical oncologist, and urologists with extensive training in prostate cancer treatment.

Patient's with an elevated PSA can be referred to the clinic for discussion with our team regarding further diagnostic recommendations. Our multi-disciplinary team will help coordinate the evaluation and management of all prostate cancer diagnoses. Our team will communicate with the primary care physician all recommendations and treatment plans developed during our evaluation.

The US Preventative Service Task Force recommends all men between ages 55-69 discuss prostate cancer screening with their physician.

THE PROSTATE CLINIC:

- Incorporates novel diagnostic approaches including multiparametric MRI and MR fusion biopsies
- Has access to PSMA PET/CT scans (*on site) and access to a variety of novel clinical trial opportunities through the Karmanos Cancer Institute and Michigan State University

CONTACT US

Prostate Clinic
