Stroke Care Plans NURS Stroke Bundle IPOC

To meet quality measures and metrics for our stroke patient population an Interdisciplinary Plan of Care (IPOC) stroke bundle will be <u>available 9/15/2021</u>. This bundle contains existing IPOCs that are most often used for this patient population and brings them all to one place to streamline the process. Additionally, the system will suggest this care plan bundle whenever an admitted patient has a qualifying NEURO Stroke PowerPlan (order set) placed, or if the Stroke Quality Measures single order is placed.

NURS Stroke Bundle IPOC Workflow

The Stroke Quality Measures order is placed, usually as part of a NEURO Stroke PowerPlan.

1. The NURS Stroke Care Plan Bundle IPOC displays as a suggested plan on CareCompass

- 2. Select any suggested plan from CareCompass to open an Orders screen pop-up window.
 - Note you may also access, accept and initiate suggested plans from the Orders component inside the chart.
- 3. Click the plus next to suggested plans. Select the NURS Stroke Care Plan Bundle and click Accept.

The bundle displays with instructions at the top. It can now be customized based on patient needs.

⊿ NURS Stroke Care Plan Bundle IPOC								
Suggested On: 8/19/2021 11:38 AM EDT								
	Reason: This IPOC has been suggested based on Stroke Quality Measures being ordered.							
⊿ Patient Care								
	🏈 Below are the most commonly used nursing plans of care for the ischemic and hemorrhagic stroke patient population.							
	Place a checkmark in each subphase that is relevant to the patient. Each subphase should be customized based on the							
	patient's assessed needs. Once customization complete, initiate the bundle.							
Ь	Particle of descent levels. One of calculation complete, made of of order. • • • • • • • • • • • • •

	팀a At Risk for Aspiration IPOC							
	ရာ Impaired Mobility IPOC							
	🗣 Impaired Communication IPOC							
	📲 Impaired Skin Integrity IPOC							
	🖳 Nutritional Deficit IPOC							

4. Navigate through the bundle placing a checkmark in any IPOC that is relevant to the patient. As each checkmark is selected, the "subphase" IPOC will open.

In the below example, the Neurological Deficit IPOC subphase was selected and opened to allow customization.

- IPOCs have common goals and interventions prechecked. Review contents and add or remove checkboxes as appropriate for the patient. As always, each IPOC also contains Patient Specific goal/intervention placeholders that can be modified to create a customized plan of care.
- 5. Once customizations are complete, select the Return to NURS Stroke Care Plan Bundle IPOC button.
- 6. As subphases are selected and customized they update to a Planned Pending status.

NEURO Hemorrhagic Stroke Admit Orders (Discontinued NEURO Hemorrhagic Stroke Admit Orders (Void) PSO Patient Status Order (Discontinued) Interdisciplinary NURS Stroke Care Plan Bundle IPOC (Planned Pending)	⊿ Patient Care	Place a checkmark in each subphase th	Planned Pending) e the most commonly used nursing plans of care for the ischemic and heckmark in each subphase that is relevant to the patient. Each subph assessed needs. Once customization complete, initiate the bundle.

 Once all appropriate IPOCs are customized, <u>make sure to select the NURS Stroke Care Plan Bundle IPOC</u> <u>header</u>. This will allow initiating all of the plans at once, rather than one at a time.

- Inte	Interdisciplinary						
	IURS Stroke Care Plan Bundle IPOC (Planned Pending)						
	Neurological Deficit IPOC (Planned Pending)						
	Impaired Mobility IPOC (Planned Pending)						
	Impaired Communication IPOC (Planned Pending)						

8. With the header selected, choose Initiate Now> Orders for Signature > Sign.

As with all IPOCs, the NURS Stroke Care Plan Bundle IPOC will display under the Interdisciplinary section in the Orders View pane. Follow usual processes to Document In Plan, including setting a Target Complete Date & Time for each goal and documenting/updating as appropriate per policy.
