New CT Lung Cancer Screening Order and Revised Workflow **November 21, 2023**

New CT Lung Cancer Screening Order and Workflow Overview

Positions Impacted: All Providers who may place **CT Lung Cancer Screening** orders.

Effective 11/22/23: A new order format will be applied to the CT Lung Cancer Screening order that includes several **required fields**. These fields validate that the patient meets the appropriate criteria to receive the test based on their age, insurance, and smoking history.

Important Note to Clinical Staff: *The current task and the CT Lung Cancer Screening Referral Form will be removed. Instead, this information will be entered directly on the order.*

The screenshot shows the 'Details for CT Lung Cancer Screening' form. Key fields include:

New CT Lung Cancer Screening Order Notifications

There are new order notification rule guidelines that have been added to prevent the placement of this order if the patient does not meet the criteria. If you see these notifications/guidelines, please review them, and proceed accordingly.

Example Order Notifications:

Alerts the Provider if a previous 'CT Lung Cancer Screening' order has been placed for this patient within the past 365 days.

- Provides information on who placed the previous order and the date/time it was placed.
- Will not trigger if previous exam was canceled or not performed.

Discern: (1 of 1)

Cerner **CT Lung Cancer Screening Criteria**

Patient has had another CT Lung Cancer Screening order placed for them within the last 365 days. This test should only be performed once every 12 months. For interval follow up 1, 3, 6 months, consider ordering the 'CT Lung Follow-Up LOW Dose'

Previously ordered by: Cerner Test, Physician - Oncologist Cerner

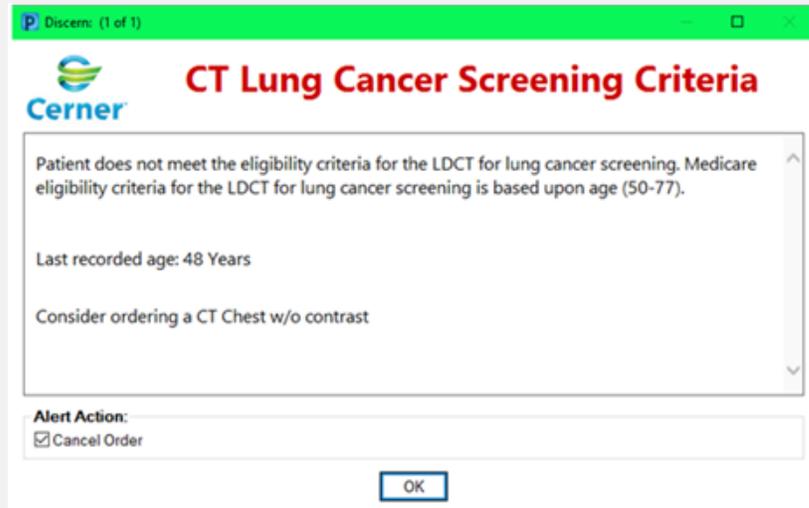

Date: 10/26/23 21:16:00 EDT

Alert Action:
 Cancel Order

Add orders for:
 CT Lung Follow-up LOW Dose

OK

- Evaluates the patient's age and insurance. Alert displays if the patient does not meet the current criteria to receive the screening.

Discern: (1 of 1)

Cerner **CT Lung Cancer Screening Criteria**

Patient does not meet the eligibility criteria for the LDCT for lung cancer screening. Medicare eligibility criteria for the LDCT for lung cancer screening is based upon age (50-77).

Last recorded age: 48 Years

Consider ordering a CT Chest w/o contrast

Alert Action:
 Cancel Order

OK
