Cerner Apps Access Change

8/27/2019

The Cerner Apps folder will be removed the morning of 9/10 for non-technical support personnel.

Applications previously accessed from Cerner Apps can still be ran from the Citrix Portal (one.mclaren.org) or from Cerner AppBar. See the following page for Cerner AppBar setup instructions and commonly used applications.

Example of Application Bar (AppBar) Setup

This is a onetime set up to prepare using the AppBar instead of Cerner App. Check with your manager on which applications you will need.

Step 1 Launch the application by double-clicking on the AppBar icon.

Step 2 A login screen displays. Enter your username and password.

Step 3 Click OK to log in.

Once logged in, the AppBar is visible at the top of the screen:

Building/Customizing your AppBar

Build and customize the AppBar with applications for your core apps. Directions are below:

Step 1 Click on the AppBar application icon.

Step 2 Check: Float... allows you to move the application around on your screen.

Step 3 Check: Large Buttons, makes life easier!

Step 4 Select Customize.

Step 5 Select the Buttons folder.

Step 6 Check the icons you want to display in the AppBar by clicking the box to the corresponding application.

Step 7 You can also move the icon order by selecting the box to the corresponding application and then the up and down arrow.

Step 8 Click OK when done.
