Commonwell - Auto Enrollment for Minors

6/08/2020

Commonwell Update Overview

Update: End users will no longer have to follow a manual process to enroll minors under the age of 19 in Commonwell. Instead, minors will automatically be enrolled in Commonwell upon a new registration in the scheduling system.

Purpose: This will speed up the process for end users by allowing them to easily retrieve outside records from Commonwell for their minor patients without having to go through the manual enrollment process.

Intended Audience: All Ambulatory Positions using Commonwell.

Commonwell Status

The Outside Records Component will now display a status of "Enrolled" for minors if the patient had a new registration in the scheduling system after the effective date of June 8th.

The screenshot shows the 'Outside Records' component in Cerner. The 'Outside Documents' tab is active, and the 'Summary' sub-tab is selected. A red box highlights the 'CommonWell: Enrolled' status in the top right corner. Below this, the 'External Document List' section shows a table with columns for 'Document Name', 'Author(s)', and 'Document Date'. The table is currently empty, displaying 'No documents found'. A 'Save to Chart' button is visible at the bottom right of the table area.

The Commonwell link indicates the patient is enrolled with "New Sources to Confirm":

The screenshot shows a patient record card for ZZTEST, PATIENTBABY. The card displays various patient details, including DOB, Age, Sex, Allergies, Patient Phone, Future Appointment, Code Status, Primary Insurance, and MRN. A red box highlights the 'CommonWell: New Sou...' link in the top right corner of the card.

ZZTEST, PATIENTBABY	DOB:06/01/18	Age:23 months	Sex:Female
