

Required Diagnosis On Request for Admit and PSO Orders

Effective **September 30, 2019** ED Providers will begin seeing a Diagnosis Tab on ED Orders

The Request for Admit Order will Require a Diagnosis:

The screenshot displays the Cerner EMR interface for a patient named ZZTEST, DESIREE STROKE. The patient's information includes DOB: 01/01/66, Age: 53 years, Sex: Female, and Allergies: Egg. The interface shows a list of orders, with the 'Request for Admit' order selected. The 'Details for Request for Admit' section is visible, and the 'Diagnoses' tab is highlighted with a red circle. A red arrow points from the text above to this tab. The 'Diagnoses' tab is currently empty, indicating that a diagnosis must be entered for this order type.

CERNER FLASH

On The Inpatient side the PSO Orders will require a Diagnosis

The screenshot shows the Cerner Flash medication order interface. At the top, there are navigation and status options: '+ Add', 'Document Medication by Hx', 'Reconciliation', 'Check Interactions', 'External Rx History', and 'Rx Plans (0): No Benefit Found'. On the right, 'Reconciliation Status' is shown as 'Meds History', 'Admission', and 'Discha'. Below this is the 'Orders' section with a 'Medication List' tab. The list contains several orders, with 'PSO Outpatient in a Bed' selected and highlighted in blue. A red arrow points from the top of the page to the 'Diagnoses' tab in the 'Details for PSO Outpatient in a Bed' section, which is circled in red. The 'Diagnoses' section shows 'Available Diagnoses' with 'Blood doping (D75.1)' listed. The left sidebar shows a 'View' menu with categories like 'NEURO Ischemic Stroke w/wo Alteplase', 'NEURO Hemorrhagic Stroke Admit Order', 'NEPH Hemodialysis', and 'ANES Elastomeric Pain Relief Ball (Initiate)'. The bottom of the sidebar shows 'Diagnoses & Problems' and 'Related Results'.
