PT and OT Discharge Recommendations

PT and OT Discharge Recommendations for Inpatients

Effective October 14, 2019, physicians will be able to view the most current discharge recommendations made by the Physical and Occupational Therapists.

The Physical and Occupational therapists document their discharge recommendations at each patient visit from the options listed below:

Discharge Recommendations

<input type="checkbox"/> Home	<input type="checkbox"/> Inpatient Rehab Facility
<input type="checkbox"/> Home with caregiver	<input type="checkbox"/> Outpatient Rehab
<input type="checkbox"/> Home with assistance	<input type="checkbox"/> Unclear at this time
<input type="checkbox"/> Home with Occupational Therapy	<input type="checkbox"/> Potential to tolerate 3 hours of skilled therapy
<input type="checkbox"/> SNF/Subacute Rehab	<input type="checkbox"/> Social work consult for SNF/Subacute Rehab

What's changed?

This data point will now pull into the Physician Mpages in the Discharge Planning section.
