Employee Health is located on the Lower Level

The Centers for Disease Control (CDC) recommends annual influenza vaccination for everyone 6 months and older. Getting a flu vaccination is one of the most effective ways to help prevent unnecessary deaths and the spread of this preventable disease. At McLaren Health Care, we care about you, your family and our patients' safety. We want everyone to be protected. McLaren requires that all employees seek appropriate immunization, either annually or as dictated by the virus. McLaren requires ALL employees to participate in the annual flu campaign, either by receiving the annual flu vaccination or signing an informed declination. This policy applies to all active McLaren Health Care employees and health care professionals. Also included are medical staff members, advanced practice clinicians, volunteers, students, contract employees and vendor representatives.
