

CERNER FLASH

Beginning 3/17/2020, there will be a new stress test order for nuclear medicine stress tests at the hospital and at McLaren Imaging on Lake Lansing Road (LN05).

Please note that there are required fields for both the nuclear medicine order for radiology and the stress test order for cardiology. Both orders are needed to properly schedule and perform the test and thus both have required fields. This will help to make sure that all parts of the needed order are received and result in a more streamlined process with less risk of error.

Diagnostic Tests
