## MGL Sleep Orders

1/2/2020

The following sleep orders were created for the Ambulatory offices and will flow into the Greater Lansing Ortho-Sleep scheduling queue. Sleep Study reports will post in Cerner's Notes section in a Sleep Study folder.

The orders listed below will default to future status and location.

### Mostly commonly ordered Sleep studies:

- **Sleep Home Study 95806**- Take home Sleep Apnea Test, also called Apnea Link.
- **Sleep Diagnostic PSG 95810**- Initial in lab full sleep study for OSA. Insurance Co. may require Home Study or Apnea Link to authorize this test. Sleep lab office can determine this.
- **Sleep CPAP/BiPAP Titration 95811**-Patient has had a recent sleep study (1 year) and is currently wearing a CPAP or BIPAP device.
- **Sleep Pediatric Diagnostic PSG 95782**- This is for *6 years old and younger*. Initial full in lab sleep study.
- **Sleep Diagnostic Split Titration 95811**- Patient has had a sleep study before and is wearing CPAP or BIPAP.
- **Sleep CPAP/BIPAP Management 94660**-To assess mask fitting prior to Titration Study

### All other Sleep study scheduling and ordering options:

- **Sleep Multiple Sleep Latency Testing (MSLT)**-Night/day time 20-hour sleep assessment for suspected Narcolepsy or Cataplexy. **Sleep consult recommended.**
- **Sleep MWT 95805**- Maintenance of Wakefulness Test: Measures the ability to stay awake under certain conditions and timeframe. **Sleep consult recommended**
- **Sleep Autopap Trial Download AMB**
- **Sleep Autopap Trial Setup AMB**
- **Sleep Home Oximetry only 94762**
- **Sleep Pediatric CPAP Titration 95783**

### Ambulatory Sleep Orders Workflow:

McLaren Provider enters a Sleep Lab study order in Cerner. Providers without access will continue to fax their orders to the Sleep Lab.

- The electronic order is routed to the Sleep Lab scheduling queue.
- The front desk staff in the sleep lab will contact the patient and schedule the appointment.
