

Vital Signs component will be live effective **November 4, 2019**. The Vital Signs component (located on mPages) has been improved to include all vital signs that may be captured on a patient during their stay. The build prior to this enhancement varied from mPage to mPage. There is no functionality change, however below is a summary of the functions of the Vital Signs component. This will not be implemented on Oncology mPages at this time.

Overview: Only documented Vital Signs will display for the time frame selected. (Picture 1)

Notice: Black triangle in the top right corner of the value represents duplicate vitals for that vital at the exact same time. By clicking on the value with the triangle, it will open an additional bar to review a more extensive review of the duplicate vitals. (Picture 2 & 3)

	Today 12:16	OCT 31, 2019 09:11	09:10	OCT 30, 2019 09:48	08:59
