

Information About Healthy Michigan Plan Co-Pays

Not all services have co-pays and not all people are required to pay co-pays. For example, services that help you get or stay healthy, like preventive services or certain services or medications that help you manage a chronic condition, may have not co-pays. Also, some people don't have to pay co-pays at all, like those who are under age 21.

The amount you owe could be different than what is shown above. These amounts are for informational purposes only. Your MI Health Account Statement will tell you what you have to pay and how the amounts were figured.
